## SUMMARY

Software Engineer with 5+ years of experience delivering enterprise-grade mobile applications across UAE & GCC. Specialized in Flutter and Android (Java/Kotlin) with strong exposure to **client-facing responsibilities**, including requirement discovery, solution design, product demonstrations, and UAT support. Proven track record in building **offline-first SaaS platforms**, workforce management systems, and blockchain-integrated applications. Seeking opportunities as a **Solutions Consultant, Technical Pre-Sales Engineer, or Senior Mobile Engineer** where technical depth and customer engagement intersect.

## EXPERIENCE

### SOFTWARE ENGINEER MOBILE

#### INAXUS, UNITED ARAB EMIRATES

Sep 2022 - PRESENT, UNITED ARAB EMIRATES

- Delivered a hybrid construction project management and document management platform used by enterprise clients across UAE & GCC.
- Led client requirement workshops with engineering and site teams, translating complex construction workflows into scalable mobile solutions.
- Conducted product demos, feature walkthroughs, and user training sessions for engineers, supervisors, and stakeholders.
- Designed and implemented **offline-first architecture**, enabling uninterrupted operations in low-connectivity construction sites.
- Optimized document approval and reporting workflows, reducing manual processing time by **30%** and improving project turnaround.
- Supported UAT cycles, production deployments, and enterprise client rollouts.
- Collaborated closely with product managers, backend engineers, QA, and customer-facing teams to ensure successful releases.
- **Technologies:** Flutter, Dart, Android (Java/Kotlin), Firebase, REST APIs, Agile/SCRUM

### SOFTWARE ENGINEER ANDROID & FLUTTER

#### FUTURE TREND LLC, UNITED ARAB EMIRATES

Feb 2022 - Aug 2022, UNITED ARAB EMIRATES

- Developed a **blockchain-based crypto lottery application** integrating smart contracts and secure transaction workflows.
- Built an **Employee Attendance & Workforce Tracking System** for FGIC (UAE Government), improving workforce visibility and monitoring accuracy.
- Participated in client and internal requirement meetings to define technical scope and delivery timelines.
- Supported application deployments, UAT testing, and post-launch issue resolution.
- Collaborated with backend, QA, and UI/UX teams to deliver stable, user-friendly mobile applications.
- **Technologies:** Android (Java, Kotlin), Flutter, Firebase, Blockchain, REST APIs

### SOFTWARE ENGINEER

#### IRINGS TECHNOLOGIES, KERALA

Aug 2020 - Jan 2022, KERALA

- Developed customized mobile applications for government and enterprise clients, including **Kudumbashree** and a Qatar-based HVAC company.
- Conducted requirement discussions, technical planning, and solution design with stakeholders.
- Presented application demos, gathered feedback, and iterated feature improvements.
- Managed end-to-end mobile application development lifecycle from architecture to store release.
- **Technologies:** Android (Java, Kotlin), Flutter, Node.js, MongoDB

## PROJECT

### INAXUS - A Hybrid Software for Construction, Project Management and Document Management

[play.google.com/store/apps/inaxus.app](https://play.google.com/store/apps/inaxus.app) App Store: <https://apps.apple.com/in/app/inaxus-2-0/id6497791662>

- Android & iOS | Flutter, Android (Java), iOS (Swift)
- Engineered a cross-platform enterprise application with offline snag creation, auto-sync, and real-time collaboration.
- Improved workflow efficiency, data integrity, and on-site accessibility for construction teams.

### SP PRODUCTIVITY TRACKER

[play.google.com/store/apps/shapoorji.mobileskillportal](https://play.google.com/store/apps/shapoorji.mobileskillportal) <https://play.google.com/store/apps/details?id=com.shapoorji.mobileskilltracking>

- Android & iOS | Kotlin, Swift, Firebase, MVVM
- Led development of a real-time workforce productivity tracking system.
- Enabled data-driven decision-making and operational cost optimization across large-scale projects.

### CART AND COOK

[play.google.com/store/apps/cart\\_and\\_cook](https://play.google.com/store/apps/cart_and_cook)

- Led the development of Cart & Cook using Kotlin, Swift, .NET, and SQLite—an online ordering app with advanced search, intuitive UI, and personalized recommendations, enhancing user engagement and simplifying local product discovery.

## BITCONIA - CRYPTO LOTTERY APP

- Android | Java, Node.js, MVVM
- Conceptualized and developed a blockchain-powered lottery application with smart contracts and secure transactions.
- Focused on fairness, compliance, and intuitive user experience.

## FGIC ATTENDANCE

[play.google.com/store/apps/app.fgic.com](https://play.google.com/store/apps/app.fgic.com)

- Flutter | Dart, Firebase
- Built a secure, cross-platform attendance and workforce monitoring solution.
- Integrated real-time tracking and backend systems to improve transparency and efficiency.

## GULF EXPERTS ANDROID APP

[play.google.com/store/apps/jibin.gulfexperts](https://play.google.com/store/apps/jibin.gulfexperts)

- Spearheaded development of an Android app using Kotlin, Firebase, and MVVM to enable real-time field inspection reporting, improving on-site productivity, data accuracy, and secure cloud-based accessibility.

## KUDUMBASHREE ANDROID APP

- Led development of an Android app for Kudumbasree and Ayalkootam units using Java, Firebase, and MVVM, digitizing paperwork processes to enhance efficiency and reduce manual workload with an accessible, user-friendly interface.

## ORYX

[play.google.com/store/apps/irins.oryx&hl](https://play.google.com/store/apps/irins.oryx&hl)

- Led development of an Android app for a Qatar-based HVAC company using Kotlin, Firebase, and MVVM, enabling field inspectors to digitally generate detailed reports, streamline workflows, and boost productivity.

---

## EDUCATION

### Bachelor of Engineering

Mangalore Institute of Technology and Engineering · Mangalore, India · 2020

---

## CERTIFICATIONS

Android App Development

Flutter Development

Full Stack Web Development

---

## SKILLS

**Mobile Development:** Flutter, Dart, Android (Java, Kotlin)

**Backend & Cloud:** Node.js, Express, MongoDB, Firebase

**Architecture:** MVVM, Offline-first systems, REST APIs

**Tools & Methodologies:** Git, Firebase CI/CD, Agile/SCRUM

**Languages:** English, Arabic, Hindi, Malayalam, Tamil

**Driving License:** UAE
