

MUHAMMED YASEEN P.V

Senior Mobile Engineer | Flutter & Android | Enterprise & Government Platforms

Dubai, UAE • yaseenpv01@gmail.com • +971 50 582 9303 • yaseenmuhammed.com • linkedin.com/in/muhammed-yaseen-p-v

PROFESSIONAL SUMMARY

Mobile engineer with 5+ years delivering enterprise and government-grade Flutter and Android applications across the UAE and GCC. Promoted from Software Engineer to Lead Software Engineer at INAXUS within two years, now the sole mobile developer owning architecture, development, App Store/Play Store publishing, and post-launch support for a live enterprise construction management platform used across the UAE and GCC. Delivered offline-first SaaS platforms and a government workforce-monitoring system for a UAE Government entity, with additional production AI experience through Google Gemini API integration for document search and summarization.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android (Kotlin, Java), iOS (Swift — integration)

Architecture: MVVM, Clean Architecture, Repository Pattern, Offline-First Systems

Backend & Cloud: Firebase, Node.js, Express.js, MongoDB, Python, REST APIs

AI & Integrations: Google Gemini API, RAG pipelines, local LLM inference (Ollama), OCR (Tesseract), FastAPI

Tools & DevOps: Git, Firebase CI/CD, Google Play Console, App Store Connect, Unit Testing

Methodologies: Agile, SCRUM, UAT Support, client and government stakeholder management

PROFESSIONAL EXPERIENCE

Lead Software Engineer – Mobile | INAXUS, Dubai, UAE

Sep 2024 – Present

- Promoted from Software Engineer to Lead after two years, taking on full technical decision-making authority as the sole mobile engineer on the platform.
- Own the mobile stack end-to-end: architecture, development, release management, and App Store/Play Store publishing for an enterprise construction management app live across UAE & GCC.
- Built AI-powered document search and summary generation using prompt-engineered Google Gemini API calls, reducing manual document review time.
- Designed an offline-first architecture enabling uninterrupted operations on low-connectivity construction sites.
- Act as sole point of technical accountability between product, client, and engineering stakeholders; own crash monitoring, compliance, and post-launch fixes.

Technologies: Flutter, Dart, Android (Java/Kotlin), Google Gemini API, Firebase, REST APIs, Agile/SCRUM

Software Engineer – Mobile Development (Android & Flutter) | INAXUS, Dubai, UAE

Sep 2022 – Aug 2024

- Delivered a hybrid construction project management application used by enterprise clients across UAE and GCC, from architecture through release.
- Optimized the document approval and reporting workflow, cutting manual processing time by 30% through real-time sync and UI/UX improvements.
- Implemented offline-first features and background sync using Kotlin Coroutines, keeping field teams productive on remote sites.
- Ran product walkthroughs, demo sessions, and UAT with project engineers and site teams; collaborated with PMs, QA, and backend engineers on releases.

Technologies: Flutter, Dart, Android (Java/Kotlin), Firebase, REST APIs, Agile/SCRUM

Software Engineer – Android & Flutter | Future Trend LLC, Dubai, UAE

Feb 2022 – Aug 2022

- Built the FGIC Employee Attendance & Workforce Tracking System for a UAE Government entity, improving monitoring accuracy and reporting transparency.
- Integrated the Google Gemini API for AI-powered image generation within a blockchain-based application.
- Developed a blockchain application with smart contracts for transparent, tamper-proof transaction logic.

Technologies: Android (Java, Kotlin), Flutter, Google Gemini API, Firebase, Blockchain, REST APIs

Software Engineer – Mobile | iRings Technologies, Kerala, India

Feb 2021 – Jan 2022

- Developed customized Android and Flutter mobile applications for government and enterprise clients, including Kudumbashree and a Qatar-based HVAC firm.

- Owned the full mobile development lifecycle from architecture through Google Play Store release.
- Digitized paperwork workflows for government units, reducing manual workload and improving field inspector productivity.

Technologies: Android (Java, Kotlin), Flutter, Node.js, MongoDB, Firebase

Android Developer | Zoople Technologies, Kochi, India

Dec 2020 – Mar 2021

- Contributed to Android app development, focusing on performance optimization and responsive UI.

Technologies: Android (Java, Kotlin), Jetpack Compose

KEY PROJECTS

INAXUS — Construction & Document Management Platform — *Flagship Product*

- Cross-platform enterprise app (iOS & Android) with offline snag creation, auto-sync, and real-time collaboration for construction teams.
- Integrated AI-assisted document search and project summary generation to streamline on-site decision-making.
- Live on Google Play and Apple App Store, used by enterprise clients across UAE & GCC.

FGIC Attendance — Government Workforce Monitoring — *Future Trend LLC*

- Built a secure cross-platform attendance and workforce monitoring solution for a UAE Government entity, improving transparency and field reporting accuracy.

Local AI Document Parser — OCR + RAG Pipeline — *Personal Project, 2026*

- Built a fully local AI pipeline (Ollama + Tesseract OCR) that ingests a PDF and returns structured, parsed JSON — no external API calls, no data leaving the device.
- Exposed the pipeline via a FastAPI backend and connected it to a Flutter client for end-to-end document upload, parsing, and review.

Technologies: Python, FastAPI, Ollama, Tesseract OCR, Flutter, REST APIs

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Computer Science — Mangalore Institute of Technology and Engineering, India (2016 – 2020)

Certifications: Android App Development • Flutter Development • Full Stack Web Development

Languages: English, Arabic, Hindi, Malayalam, Tamil | UAE Driving License holder
